

Gaurav Chinchane

DevOps Engineer / SRE

Dublin, Ireland | +353 89 970 1105 | gaurav.chinchane25@gmail.com | [LinkedIn](#)

SUMMARY

DevOps / SRE engineer with 5+ years in cloud infrastructure roles, including 4+ years' operating production Kubernetes platforms and CI/CD pipelines across AWS and Azure. Experienced across the full delivery lifecycle infrastructure automation (Terraform, Ansible, GitOps), observability engineering (Prometheus, Grafana), and security-conscious platform design with a track record of measurable reliability and delivery improvements backed by monitoring data and CI/CD metrics. Progressed from infrastructure support through to senior ownership of release engineering and CI/CD strategy. Comfortable operating as an individual contributor and as a mentor who raises team capability on Kubernetes, Terraform, and GitOps practices.

EXPERIENCE

Trust and Safety Executive — Accenture

04/2025 – 06/2026 | Dublin

- Performed structured QA and audit-readiness validation across high-volume, GDPR-regulated data-handling workflows, including access-control and security-standard checks across cross-functional teams.
- Sustained high-accuracy decision-making under volume and time pressure across hundreds of compliance reviews per week a discipline adjacent to incident triage and operational reliability work, drawing on the same structured, evidence-based decision habits used in on-call diagnosis.

DevOps Consultant — OK Infosolutions (Remote)

08/2023 – 03/2025

- Built and maintained Jenkins and GitHub Actions pipelines for 20+ microservice deployments, achieving a 99.8% deployment success rate and eliminating most manual release steps through automated gates and same-day rollback capability.
- Authored reusable Terraform modules for AWS EKS and Azure AKS, standardising provisioning across client environments and cutting environment spin-up time by 60%.
- Delivered 24/7 on-call support sustaining a measured 99.9% service availability (tracked via CloudWatch/Azure Monitor dashboards); owned RCA on production incidents and implemented preventive controls that held incident-free streaks across multiple engagements.
- Built Prometheus + Grafana observability stacks with custom alerting, reducing issue detection time by 40% by surfacing anomalies ahead of user impact.
- Designed GDPR-compliant SFTP data exchange pipelines with encryption at rest and in transit, achieving 100% security compliance across client audits.

DevOps Engineer — Birlasoft Ltd, India

06/2019 – 12/2022 | Pune

Progressed from infrastructure support through to senior ownership of Kubernetes platform engineering and release strategy over a 3.5-year tenure.

- Took ownership of EKS infrastructure for 15+ production microservices in the senior phase of the role, designing blue/green and canary release strategies that reduced deployment-related downtime and enabled zero-downtime rollouts.
- Automated Jenkins, GitLab CI, and ArgoCD workflows and embedded OWASP security scanning into commit pipelines, increasing release frequency and shifting vulnerability detection earlier in the development cycle.
- Standardised deployments via Helm charts and GitOps across dev, staging, and production clusters, eliminating configuration drift and cutting manual deployment steps.
- Built CloudWatch + Prometheus + Grafana dashboards tracking pod latency, CPU utilisation, and cluster health, improving incident resolution time through proactive monitoring and runbooks.
- Automated configuration management across 50+ servers using Ansible and Python, reducing manual patching effort and enforcing consistent security baselines.
- Implemented IAM least-privilege, Kubernetes RBAC, and network policies with zero privilege-escalation incidents across all environments.
- Mentored junior engineers on Kubernetes, Terraform, and GitOps, compressing onboarding time and building shared on-call readiness across the team.
- Early in the role: supported non-production environments, assisted with Jenkins pipeline builds, and contributed to Docker workflow automation foundational experience that progressed into the platform ownership above.

PROJECTS

Banking App DevOps Pipeline (Spring Boot on AWS EKS)

- Built a multi-stage CI/CD pipeline for Spring Boot microservices on EKS - Docker builds, OWASP checks, Terraform IaC, and Prometheus + Grafana observability in a single automated flow. Published as a LinkedIn technical case study.

End-to-End Three-Tier Application on AWS EKS (GitOps + ArgoCD)

- Deployed a three-tier application using GitOps with ArgoCD, reduced provisioning time with Terraform, integrated Prometheus + Grafana for monitoring and alerting, and minimised manual intervention through automated sync.

DevOps Transformation for US Retail Client (Microservices on AWS EKS)

- Built Jenkins-driven CI/CD pipelines for AWS-based microservices on EKS, provisioned infrastructure with Terraform, integrated Prometheus and Grafana for observability, and implemented OWASP-based security checks.

SKILLS

Cloud Platforms: AWS (EKS, EC2, S3, IAM, CloudWatch, VPC, Security Hub, GuardDuty), Azure (AKS, Monitor, DevOps, Virtual Machines)

Container & Kubernetes: Kubernetes (EKS/AKS), Docker, Helm, ArgoCD, GitOps — cluster lifecycle, RBAC, network policies, auto-scaling, multi-tenant isolation

Infrastructure as Code: Terraform (advanced, reusable modules), Ansible, AWS CloudFormation

CI/CD: Jenkins, GitHub Actions, GitLab CI, Azure DevOps, AWS CodePipeline, ArgoCD

Observability: Prometheus, Grafana, ELK Stack, CloudWatch, Azure Monitor, Application Insights

Scripting & Automation: Python, Bash, YAML, PowerShell, Go (working knowledge)

Security & Compliance: IAM, WAF, GuardDuty, Security Hub, PKI, Secrets Management, GDPR pipelines, OWASP

Networking: TCP/IP, DNS, HTTP/HTTPS, VPN, Load Balancing, Ingress/Egress, Firewall rules, Network Policies

Practices: SLO/SLA/MTTR/error budgets, on-call runbooks, post-mortem culture, chaos engineering principles, Agile/Scrum

Databases: MySQL, MongoDB (working knowledge)

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate (SAA-C03)
- Certified Kubernetes Administrator (CKAD) — In Progress

EDUCATION

MSc, Cloud Computing — National College of Ireland, Dublin

BEng, Information Technology — University of Pune, India
